On the occasion, the Cabinet Minister handed over the mobile emitter of provincial radio, which enables the live broadcast from any location in the province.

The Minister pointed out that the unveiled system will "somehow" allow all municipalities of the province to receive the signal of National Radio of Angola, since citizens have the right to be informed about events in the country and the rest of the world. He said he hoped the radio professionals make the most of this tool and all the technological means to boost its activity, using them with zeal and dedication.

In his turn, the Provincial Governor of Malanje, Norberto dos Santos, augurs that with this advanced equipment there are more dynamic professionals in collecting and processing information.
