

Electricity congress to address key power issues

Philindile Nzimande, CEO of EDI Holdings, is just one of the keynote speakers who will address delegates at the Africa Power and Electricity Congress at Sandton Convention Centre, Johannesburg, 16 - 20 April 2007. Now in its ninth year and organised by Terrapinn, the congress and its five co-located events is where Government, utilities and major end users will come together to seek solutions that will solve their power challenges. For more info, go to www.terrapinn.com/2007/powerza/.
