

Fifth WoodEX for Africa exhibition set for July 2018

WoodEX for Africa 2018 will take place 11-13 July at Gallagher Estate in Midrand. Hosted biennially, the event is a timber-focused trade exhibition offering a business and networking platform to connect and grow the African timber, tooling and machinery markets.

Building on previous years, WoodEX for Africa 2018 will showcase timber and woodworking products and services, such as woodworking machinery, fixtures and fittings, decking, flooring, structural timber, timber preservatives and treatment, sawmilling and logging, pulp and paper manufacturing, and wood material and veneer production.

Timber Talk programme

At the heart of WoodEX for Africa is the event's Timber Talk programme which comprises a number of short presentations by industry influencers, including system designers, contractors, manufacturers and thought leaders who address pressing industry issues and hot topics from across the timber world. WoodEX for Africa's Timber Talk sessions are free to attend and no bookings are necessary.

The event is particularly popular with the African trade, which makes up 60% of international trade visitors, hailing from the likes of Angola, Botswana, Kenya, Malawi, Namibia, Tanzania, Zambia and Zimbabwe.
